Discontinuing GT7510 & GT7310 Bottom Load Models

Due to limited demand NABCO Entrances will be discontinuing production of low energy swing operator models GT7310 & GT7510. These units are comprised of GT710 drive assemblies mounted in overhead concealed and surface applied bottom load headers.

The discontinued GT7310 & GT7510 models can be substituted with the GT8310 & GT8710 models respectively as per the following chart.

Swing Operator Header Selection Chart (except GT20)				
Base Model	Overhead Concealed (OHC) Bottom Load	Overhead Concealed (OHC) Side Load Figure ()	Conversion Unit (CU) Bottom Load Figure ()	Conversion Unit (CU) Side Load Figure ()
Full Automatic (mechanical closer)	GT300	GT8300	GT400	GT8400
Low Energy (mechanical closer)	GT350	GT8350	GT500	GT8500
Low Energy (hydraulic closer)	GT7310	GT8310	GT7510	GT8710
Note: all models preceded by "8" indicates a side load header				

This change is effective December 31, 2019

All orders received or quoted by NABCO Entrances prior to the above date will continue to be honored.
