## New Video Series on Glazing the GT1175 All Glass Slider

The NABCO Tech Support Department is pleased to announce the release of a new instructional video series on Glazing the GT1175 All Glass Slider.

This video series discusses the installation and securing of glass panels in the GT1175 All Glass slider and is aimed at customers who purchase the GT1175 All Glass slider but who want to supply and install their own glass. The series consists of 7 short videos each about 2-5 minutes long. They are:

[Video 1: Initial Setup](#)

[Video 2: Taping](#)

[Video 3: Installing the Glass Panels](#)

[Video 4: Rail Installation](#)

[Video 5: Final Preparations](#)

[Video 6: Mixing & Applying the Rockite](#)

[Video 7: Removing Tape and Applying Silicone](#)

This series complements the recently released GT1175 All Glass Installation manual, part number C-00361. Within the installation manual are QR codes that, once scanned with a smartphone, will link the reader to the videos.

These videos can also be viewed in the “Support” section of our web site at <https://www.nabcoentrances.com>
