Prep as Clean Room unit

Rocker switches at location OTHER than on interior jamb face (include diagram with order)

Aluminum Cart Bars (specify which panels to receive bars)

Additional sidelite/s

Width

Height

Muntins

Note 1: On surface applied units, indicate the desired location of rocker switches in Notes area at top of this form. Since a telescopic unit has covers on both sides of the header, when it is surface applied the access to the interior is limited to one side of the header. The hook on the cover is ripped off on the surface applied side so that the cover can be slid downward for access to the drive belt on that side. There will be screws in the bottom of the cover holding it on.
