**Attention:** Wait at least (10) seconds before disconnecting cables to allow newly set Values to complete. If power to the Opus Control needs to be turned OFF, wait (20) more seconds.

### Enter the License Number

1. Go to the Android Device. Open the email from Tech Support. Copy the License number.
2. Tap onto the NABCO icon. Paste the License Number into the License field → Click onto “Yes” to Authorize the License Number.

### Connect a Single Control to the UG-A12

1. Turn OFF the Control. Plug the Cable between the Control socket and the bottom of the UG-A12. Turn ON the Control.
2. Go to the Android Device. Ensure UG-A12 is ON → Tap onto the NABCO icon → Connect → Select the Serial Number that closely matches the UG-A12 Serial Number. Turn ON the Control.

### Connect a Pair of Controls to the UG-A12

1. Go to Master Control; connected to activation devices.
2. Select Sim-Pair from Optional Setting screen.
3. Go to Slave Control; not connected to activation devices.
4. Tap onto (YES) to copy setting from the Master Control.
5. Tap onto (OK) to automatically change the TYPE.
6. Disconnect UG-A12 Bluetooth Module.
7. Connect the Sim-Pair Harness between the Slave Control and Master Control.
