

NABCO GT1175 SLIDING DOORS

AUTOMATIC SLIDING DOOR SERIES

NABCO 

Designed for Dexterity to Accomodate Many Applications

Including: Healthcare, Hospitality, Retail, and Office Buildings

Features and Benefits

Motorized belt-drive for silent operation

- Opus Control engineered to withstand challenging environmental/weather conditions.
- Integral flush glaze framing systems provide a more attractive appearance and a larger clear viewing area
- Large urethane door rollers for smooth and long lasting operation
- Superior double mohair thermal brush on center style of doors provides continuous moisture break
- Adjustable thermal brush system on the bottom of the door adds extra life
- Extra duty anodized roller track for long lasting durability
- Meets ANSI Standard 156.10 for power-operated pedestrian doors. UL, CSA and CSFM approved

GT1175 Automatic Sliding Doors Series

The NABCO GT1175 Series sets the standard for smooth operation and quiet performance. While elegant by design, the GT1175 Series is engineered to withstand challenging environments and weather conditions. NABCO's microprocessor control provides reliable door operation, significant usage counts, and diagnostic features for quick troubleshooting and reduced maintenance costs. Offering a prompt return on your investment with one of the lowest lifetime costs of ownership, the ultra-quiet, high-performance GT1175 Series is the right solution for every automatic sliding door entrance. Available as a single slider and bi-part.

GT1175 with Opus Control Header

Header cover is pre-wired for sensor installation and uses extra-thick aluminum extrusions to minimize deflection.

GT1175 Automatic Slider

The NABCO **GT1175** ultra-quiet, high-performance entrance system is the perfect solution to complement any entrance. Configurations include fixed sidelite or full breakout and are available as single or bi-part sliders. The standard GT1175 offers a variety of options and is equipped with sensor systems that comply with ANSI A156.10 standard which promotes reduced liability and increased safety. It is the ideal solution for almost all standard slide door applications.

GT1175 Telescopic Automatic Slider

The NABCO **GT1175 Telescopic** Sliding Door puts your mind at ease when looking for an automatic door solution and limited space is a concern. The GT1175 Telescopic is equipped with sensor systems that comply with ANSI A156.10. This system combines the elegant look of a large, clear door opening with space-saving versatility, making this the ideal automatic door entrance solution for unique applications.

GT1175 All-Glass Automatic Slider

The NABCO **GT1175 All Glass** Sliding Door eliminates vertical framing, resulting in a sleek, contemporary look. The low-profile bottom rail allows a larger, unobstructed view that is perfect for enhancing an attractive lobby or well-manicured grounds. The GT1175 All Glass is equipped with sensor systems that comply with ANSI A156.10. The GT1175 All Glass Sliding Door is a seamless automatic door entrance solution.

GT1175 Hurricane Automatic Slider

The NABCO **GT1175 Hurricane**-rated Sliding Door System is in a class of its own. While elegant by design, the GT1175 offers pressure ratings up to 105psf, widest industry frame width to 18', and a revolutionary dry-glaze system that allows damaged glass to be replaced without replacing the entire door panel. The GT1175 Hurricane Slider is equipped with sensor systems that comply with ANSI A156.10. The GT1175 Hurricane Package is the perfect solution to showcase your entrance. Available with a Level E Impact rating to meet applicable codes for essential facilities in hurricane zones.

NABCO GT1175 with Conceal Sensor Package

This package includes proven sensor technology in a concealed package offering advanced detection functionality. Pinpoint detection areas, identify pedestrians stopped in the door threshold area and decreases interference caused by snow and rain. The ECO function reduces the influx of wind and dust while promoting energy efficiency by disregarding pedestrians walking away from the door, thus allowing the door to close sooner.

NABCO SWING DOOR OPERATORS

AUTOMATIC SWINGING DOOR SERIES

NABCO 

Swing Door Operators: Where Entrance Solutions are Automatic

- Engineered for interior and exterior use
- Designed to automate essentially any new or existing door
- Proven designs for proven reliability
- Adjustable opening and closing speeds allow the door to close sooner for energy savings or slower for increased pedestrian protection
- “Push-N-Go” feature provides easy automatic operation for handicapped or elderly pedestrians and eliminates the cost of wall switches
- Recycle feature stops and reverses direction of opening door when an object is encountered for greater pedestrian protection
- Auxiliary sensing devices available
- Additional safety devices can be easily added
- From Low Energy to Full Power, NABCO offers entrance solutions to accommodate any application
- All features, components and accessories meet ANSI 156.19 standards. They are also ULC and UL approved and comply with ANSI 117.1 and the Low Energy Operator section of ADA

Automatic Swing Door Operators

NABCO 

NABCO designed our Low Energy and Full Power Swing Door Operators to automate nearly any new or existing door. To create a custom operation, our adjustable closing speeds allow a door to close sooner for energy savings or slower for increased pedestrian safety. We ensure the industry's longest-lasting products - and the highest customer satisfaction - by rigorously testing each operator for hundreds of cycles.

NABCO Swing - Swing Door Operator/ NABCO Connect

With its easy set-up process, the **NABCO Swing** is ideal for converting existing manual doors to automatic operation and can handle up to 330 lbs. of door weight in low-energy applications. The NABCO Swing has a sleek, low-profile design and is non-handed, allowing it to be used on both left- and right-handed swing door applications. The operator is also remote access enabled through the NABCO Connect iOS and Android App, allowing the switch between daytime and nighttime modes to be scheduled. With the NABCO Swing and the NABCO Connect App, you can even use your smartphone to Open and Close the Door.

Heavy Duty & Low Energy ADA Operator - GT500/GT8500

The **GT500/8500 Heavy Duty/Low Energy ADA Operator** is designed to automate nearly any new or existing doorframe. The side load header access panel simply pivots up out of the way and locks into position to permit quick install or service. The Low Energy performance, combined with adjustable opening and closing speeds, reduces energy usage to help offer a prompt return on your investment. The GT500/8500 is engineered for both interior and exterior use.

Low Energy ADA Operator - GT710/GT8710

The **GT710/8710 Low Energy ADA Operator** is designed to automate nearly any new or existing door. The GT710/8710 operates in both automatic and manual modes with a hydraulic back-check that protects the door and mechanical operator from damage when forced open in windy conditions or when manually operated. The Low Energy performance, combined with adjustable opening and closing speeds, reduces energy usage to help offer a prompt return on your investment. The GT710/8710 is approved for use on fire door assemblies rated up to 3 hours. It's engineered for interior and exterior use.

Surface-Mounted Operator - GT400 & GT8400

The **NABCO GT400/8400 Surface-Mounted Swing Door Operator** is engineered for interior & exterior use and designed to automate any new or existing door frame. This heavy-duty system can handle pedestrian traffic under the busiest conditions. Its proven mechanical design provides smooth, long-lasting operation. The Sideload header access panel pivots up and locks into position, out of the way, enabling quick installation and ease of servicing.

Overhead Concealed Operator - GT300 & GT8300

The **NABCO GT400/8400 Surface-Mounted Swing Door Operator** is engineered for interior & exterior use and designed to automate any new or existing door frame. This heavy-duty system can handle pedestrian traffic under the busiest conditions. Its proven mechanical design provides smooth, long-lasting operation. The Sideload header access panel pivots up and locks into position, out of the way, enabling quick installation and ease of servicing.

Fire Door Operator - GT600 & GT8400/8500

The **GT600, GT8400, and GT8500 Fire Door Operators** offer state-of-the-art fire door protection. In the event of a fire emergency, the system powers down, allowing the doors to close and latch. Entry is prevented, but personnel can exit by pushing the panic hardware.
