

NABCO RETROFIT KITS

FEATURING NABCO OPUS CONTROL

NABCO

Retrofit Solutions for Almost Any Brand of Automatic Sliding & Swing Operators

- NABCO Branch Service Technicians and Distributors can replace the internal mechanical components and controls of almost any brand of Automatic Sliding and Swing Door with NABCO Retrofit Kits.
- NABCO Retrofit Kits can be an economical option to replace almost Any Automatic Sliding Door or Swing Door Operator.
- Reduce waste and minimize disruption and downtime by reusing structural components like door frames and structural components.
- The NABCO Opus Control for easier onboard programming.

Typical Components of a NABCO Retrofit Kit:

- Mechanical (Motor, Belt, Mounting Hardware, etc.)
- Electronic (Opus Control)
- Harness (Connectors between Mechanical and Electronic Components)

NABCO RETROFIT KITS

FEATURING NABCO OPUS CONTROL

Retrofit Solutions for Automatic Sliding & Swing Operators

New NABCO automatic sliding doors and swing door operators are typically the preferred solution for new construction, major renovations, ADA-driven conversions of manual doors, and replacement of failed automatic door systems. In certain situations, however, a NABCO Retrofit Kit may provide a more cost-effective and practical alternative. Retrofit Kits replace the critical mechanical and electronic components of an existing automatic door operator while preserving the existing doors, frame, header, and other visible architectural elements. This approach can extend the life of the entrance system while minimizing disruption, installation time, and capital expense.

NABCO Retrofit Kits Can Replace the Internal Components of the Following Brands and Models of Automatic Door Operator and More

Retrofit Kit Selection Guide

Part #	Product	Header Models	Configuration
A-01423	KIT,RETROFIT,SLIDER,VS-150,WITH OPUS	NABCO GT1175, Stanley Duraglide	Retrofit Kit
