

NABCO ISO-CERTIFIED MANUFACTURING PLANTS

NABCO Builds Automatic Door Products in Two ISO-Certified Manufacturing Plants

- NABCO Plant 1 (S82 W18475 Gemini Drive, Muskego, WI 53150)
- NABCO Plant 2 (S81 W18475 Gemini Drive, Muskego, WI 53150)

ISO 9001 is the standard for quality management

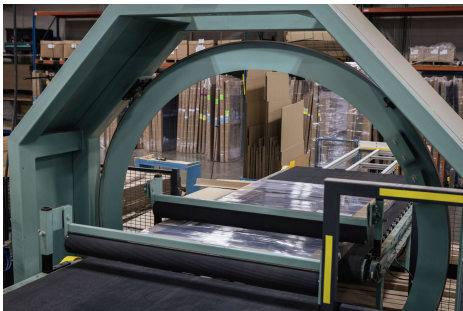

- Confidence in quality control processes
- Effective training and safety procedures
- Increased customer support

NABCO ISO Certification

The ISO (International Organization of Standards) 9001 standard is a **Quality Management System (QMS)** that helps NABCO meet customer and regulatory requirements while contributing to improving product and service quality. ISO 9001 certification recognizes that a manufacturing facility meets specific **quality, safety, and efficiency standards**. Both of NABCO's plant facilities follow specific procedures when building automatic and manual door products.

ISO Certification means living up to NABCO's mission: **to create the highest-quality products and offer exemplary service with efficiency and better accessibility for everyone**. To fulfill our vision: **to be the preferred provider of innovative, high-quality entrances and building envelope solutions**, each of our products is built to last for decades, with very few service calls once the door is installed, offering the lowest cost of ownership in the industry

In each of NABCO's plant facilities in Muskego, workers go through a series of processes in constructing and shipping our doors. Employees are trained in safety procedures, whether it's **forklift certification, PPE, machine safeguarding, fire safety, first aid, hazard communication, spill responses, emergency planning**, and much more.
